

Your Friday Water Report

This Week's Topic:

Urgent Repair

Within in the past week, six separate leaks were detected near where Harris Road and Chico Drive intersect. A 12-inch iron water main buried in corrosive soil had, over the years, developed large holes. The utility is now replacing an estimated 1000 feet of iron pipe with PVC, south from the intersection and then west. Depending upon how badly corroded they find the pipes are as they dig along the route, the project is expected to take about a month. Customers in the area should expect intermittent outages of water supply. However, the City intends to use temporary feed pipes to residences during the replacement work so as to restrict outages to brief switch-over times.

Daily Averages for 07/02- 07/08

Gallinas River Flow 1.79 Mgd*

This week in 2013 was 0.87 Mgd

Avg. River Diversions 1.62 Mgd

Yr. to date 323 Mg*; year max. 896 Mg

Draw from Wells 0.00 Mgd

This week in 2013 was 0.44 Mgd

Fresh Water Demand 1.40 Mgd

This week in 2013 was 1.58 Mgd

As of 07/08/14:

Bradner Storage 67.71 Mg

Peterson Storage 44.54Mg

Storrie Lake Storage 140.00 Mg

Reservoir Storage 75.7%

Las Vegas Rainfall 1.05"

Snowpack Water Equiv. 0.0 inch

This date in 2013 was 0.0 inch

This date median is 0.0 inch

*Mgd = Million gal. per day, Mg = million gal

Did You Know? Despite the recent rainfall, the U.S. Drought Monitor shows a major swath of San Miguel County to still be in extreme drought, the next to worst category that they report.
